Aim

Todesign and build a functional Gym Membership Enrollment Form in Zoho Creator that demonstrates the correct use of all thirteen Basic Fields available in the Form Builder, while providing a structured method for collecting and processing new member enrollment details.

Problem Statement

A fitness center currently enrolls new members using a printed registration form at the front desk. This process is slow, makes member information difficult to manage, and does not provide a structured record of a member's fitness goals or medical conditions before training begins. Trainers also have no visibility into member preferences before the first session.

The proposed low-code application replaces the paper process with a digital enrollment form. The form captures personal details, contact information, emergency contact, membership plan and type, fitness goals or medical notes, preferred activities, scheduling information, and health declaration in a structured format.

Procedure

1.Log into ZohoCreator and create a new application titled “Gym Membership Enrollment & Front Desk Management”.

2. Create a form named “Membership_Enrollment_Form” and arrange the fields into four logical sections: Member Details, Contact Details, Membership & Fitness Preferences, and Scheduling & Health Declaration.

3. Add all thirteen Basic Fields specified in the use case: Name, Email, Address, Phone, Single Line, Multi Line, Number, Date, Time, Drop Down, Radio, Multi Select, and Checkbox.
4. Set the field link names and configure the appropriate choices for Membership Plan, Membership Type, and Preferred Activities.
5. Configure the required validations: mandatory Member Name, Age, Membership Type, Membership Plan and Health Declaration Waiver; email format validation; Indian phone-number validation; Age range 14-75; Preferred Start Date not earlier than today; and a checked waiver before submission.
6. Preview the live form, enter the sample enrollment details, and submit the record.

7. Open the Membership_Enrollment_Form Report and verify that the submitted member record has been stored correctly.

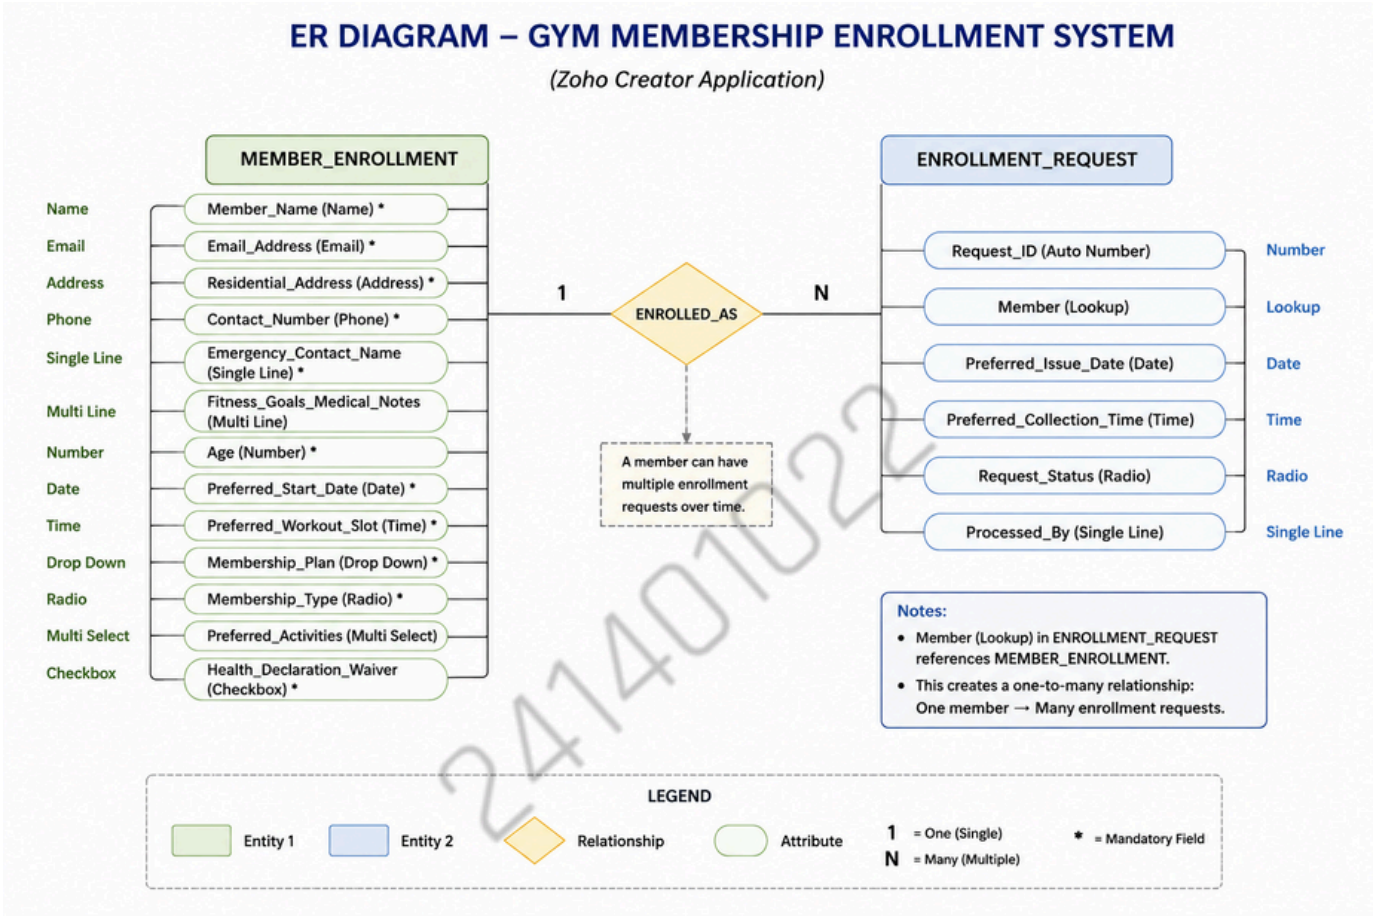

Data Model

Thea pplicationuses one main form, Membership_Enrollment_Form, which stores each prospective member enrollment as a structured record. Each submitted record contains the member's identity, contact details, emergency contact, membership choices, fitness preferences, scheduling details, and waiver acknowledgement. The corresponding report is used by the front desk to review and filter submitted enrollment records.

Form Structure

Section	Key Fields	Purpose
Member Details	Member Name, Age, Membership Type	Captures the member's identity and enrollment category.

Section	Key Fields	Purpose
Contact Details	Email Address, Contact Number, Residential Address, Emergency Contact Name	Stores contact and emergency information for communication and safety.
Membership & Fitness Preferences	Membership Plan, Preferred Activities, Fitness Goals / Medical Notes	Captures plan selection and information useful for membership setup and training.
Scheduling & Health Declaration	Preferred Start Date, Preferred Workout Slot, Health Declaration Waiver	Captures the preferred start schedule and member acknowledgement of the liability waiver.

Basic Fields and Their Mapping

The table below maps every Basic Field required by the use case to its field name, purpose, and sample value.

Basic Field	Form Field Name	Purpose	Sample Value
Name	Member_Name	Captures the full name of the prospective member using First Name and Last Name sub-fields.	Vignesh Raja
Email	Email_Address	Captures a validated email address for sending the enrollment confirmation and schedule.	vignesh.raja@example.com
Address	Residential_Address	Captures the member's full residential address with city, state and pincode.	14, Bharathi Nagar, Erode, TN, 638001
Phone	Contact_Number	Captures a validated mobile number for the gym to confirm enrollment and send reminders.	+91 90470 88990
Single Line	Emergency_Contact_Name	Captures a short free-text name for the emergency contact person.	Priya Raja (Spouse)
Multi Line	Fitness_Goals_Medical_Notes	Captures free-text details of the member's fitness goals and any relevant medical conditions.	Aiming for weight loss and improved stamina; has mild knee discomfort from past injury.
Number	Age	Captures the member's age as a numeric value and supports the configured age range.	27
Date	Preferred_Start_Date	Captures the member's preferred date to begin the membership.	01-Aug-2026
Time	Preferred_Workout_Slot	Captures the member's preferred daily time slot for workouts.	6:30 AM
Drop Down	Membership_Plan	Presents a single-select list of membership plans offered by the gym.	Quarterly Plan
Radio	Membership_Type	Captures a single mandatory enrollment category.	New Member
Multi Select	Preferred_Activities	Allows one or more fitness activities or classes to be selected.	Weight Training, Zumba, Yoga
	Health_Declaration_Waiver		Checked (Agreed)

Explanation of Screenshots

The followings creenshotsshouldillustrate the complete workflow: configuring the Basic Fields in the Zoho Creator Form Builder, displaying the live enrollment form to the user, and verifying the submitted record in the report.

1. Input - Zoho Creator Form Builder

The form builder view should show the Basic Fields palette and the complete Membership_Enrollment_Form. The centre panel should contain all thirteen fields: Member_Name, Email_Address, Residential_Address, Contact_Number, Emergency_Contact_Name, Fitness_Goals_Medical_Notes, Age, Preferred_Start_Date, Preferred_Workout_Slot, Membership_Plan, Membership_Type, Preferred_Activities, and Health_Declaration_Waiver. The field properties panel should show the configured link name, choices where applicable, mandatory validation, and other relevant settings.

2. The Form - Member Details and Contact Details

The first part of the live form should capture the member's name, age, membership type, email address, contact number, residential address, and emergency contact name. These fields provide the core identity and communication details required before a new member begins training.

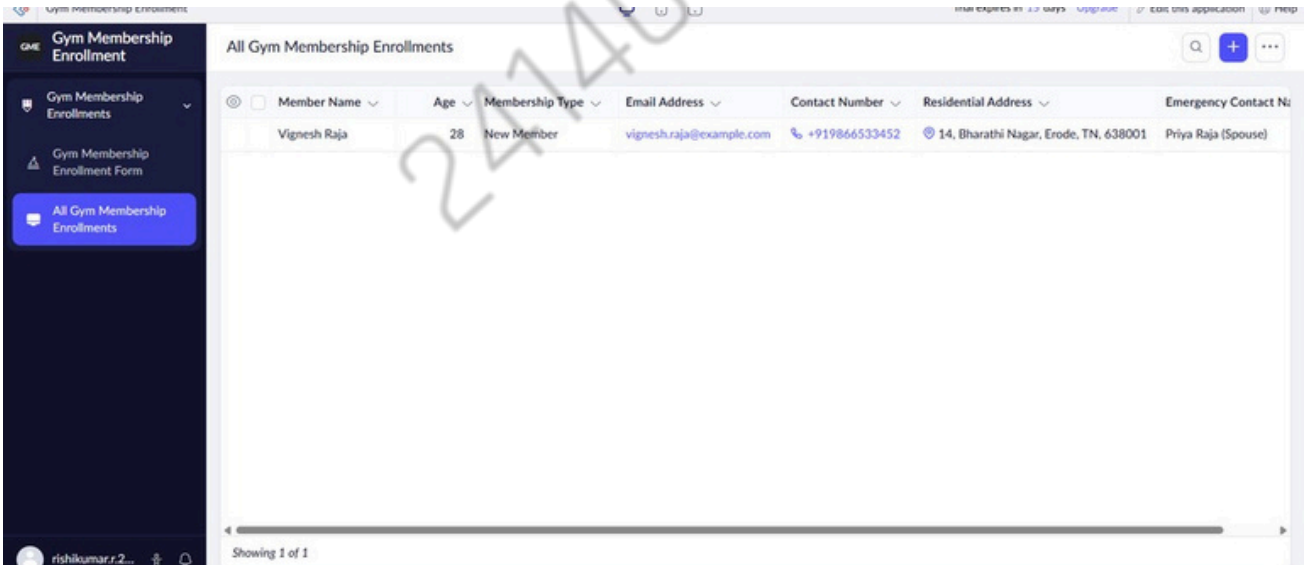

3. The Form - Membership, Fitness, Scheduling and Health Declaration

The second part of the live form should capture membership plan, preferred activities, fitness goals or medical notes, preferred start date, preferred workout slot, and the health declaration waiver. The member must agree to the waiver before submission.

4. Output Data

After the form is submitted, the record should appear in the Membership_Enrollment_Form Report, confirming that the data has been stored correctly. The report should display the submitted member's key values such as Member Name, Age, Membership Type, Email Address, Contact Number, Membership Plan, Preferred Start Date, and Preferred Activities.

Result:

The Gym Membership Enrollment Form was successfully designed and implemented in Zoho Creator using all thirteen required Basic Fields. The form was organised into four sections to capture member details, contact information, membership and fitness preferences, and scheduling and health declaration. Appropriate validations were configured, sample member data was submitted successfully, and the submitted record was verified in the Membership_Enrollment_Form Report, demonstrating a functional digital gym membership enrollment system.
